

Universal American enjoyed utilizing Technical ProSource to staff our help desk with IT professionals. I love the fact that when we placed a request to Technical ProSource the candidates were qualified. The team of Help Desk professionals that we built with the employees provided from Technical ProSource is first rate.

The professionals that were assigned to us were knowledgeable, professional and very enthusiastic about helping us set and meet our goals. They shared new ideas with us, and we were able to hire several of these candidates to our team here at Universal American. We value our relationship with Technical ProSource and look forward to continued success with them.
